

Bio-Film® Extra

Spreader-Sticker Adjuvant

GENERAL INFORMATION

Bio-Film Extra is a self-emulsifiable, nonionic spreader sticker adjuvant intended for use with most plant protection products in which the label permits the use of a spreader sticker.

Bio-Film Extra is compatible in spray solutions with most commercial plant protection products and foliar feed micronutrients.

A thin coating of Bio-Film Extra spreader sticker forms an elastic film and bonds the accompanying tank mix product to the plant foliage. This enhances the efficiency of the spray application and minimizes loss through rainfall or irrigation run-off.
