

- **Improves Distribution and Retention**

Bio-Film is a water soluble spreader-sticker which is formulated to provide improved distribution and retention of fungicide, insecticide, acaricide and other crop protection or plant nutrient sprays that recommend the use of a spray adjuvant.

- **Provides a Sticker To Reduce “Wash-Off”**

Bio-Film is a high contact sticker/extender designed to retard pesticide wash-off due to rainfall, irrigation or dew.

- **Reduces Surface Tension of Spray Droplets**

Bio-Film contains surface active agents which aid in spreading by reducing the surface tension and contact angle of the spray droplets.
