

AMS Standard™

Dry Ammonium Sulfate / Sprayable Grade Ammonium Sulfate Tank Mix Adjuvant

GENERAL INFORMATION

AMS Standard is sprayable grade ammonium sulfate that is milled and screened for enhanced solubility.

AMS Standard is an effective water conditioning agent that minimizes hard water mineral antagonism in spray tank mixes.

DIRECTIONS FOR USE

AMS Standard can be diluted in water up to 34% by weight.

Agitate tank mix water while slowly adding AMS Standard to the water. AMS Standard has been milled and screened to enhance solubility and purity of the products.

When diluted in water at maximum capacity, AMS Standard delivers up to 3.4 pounds of solubilized ammonium sulfate per 1 gallon of water. This meets or exceeds most herbicide label AMS recommendations to mitigate hard water antagonism.
