

• A Unique Blend

Organosilicone MVO is a unique blend of highly refined and modified spray oil and nonionic organosilicone.

• Enhances Wetting and Absorption

Organosilicone MVO's unique chemistry allows for enhanced wetting and absorption of those pesticides or products which labels recommend the addition of a spray adjuvant to improve performance.

• More Uniform Spray Deposit

Organosilicone MVO added to a spray tank solution will improve a spray application by physically modifying the wetting and spreading characteristics, the result being a more uniform spray deposit.

• Use Rates

Aerial: 6 to 16 pints per 100 gallons

Ground: 3 to 5 pints per 100 gallons

Organosilicone MVO™

Modified Vegetable Oil and Surfactant Blend

Functioning Agents:
