

PRODUCT INFORMATION

Fraction™

Water Conditioning Agent for Herbicide Sprays / Dry Water Soluble Granules

GENERAL INFORMATION

FRACTION is a specially formulated blend of reduced rate water conditioning and sequestering agents intended for use with glyphosate and other herbicide spray applications that recommend the use of ammonium sulfate or nitrogen fertilizer as a tank mix additive.

FRACTION is a spray grade granule that readily goes into solution.

FRACTION improves weed control by conditioning and acidifying the water.

FRACTION works to maximize herbicide performance by neutralizing antagonism from water impurities such as iron, calcium and magnesium.

FRACTION is compatible with all glyphosate formulations and with separately applied drift retardants or nonionic surfactants and is approved for aquatic use.

FRACTION can be used as a replacement for ammonium sulfate under most conditions. Where extremely hard water conditions exist in conjunction with difficult to control weeds, additional FRACTION or ammonium sulfate may be required.

USE RATES

For Ground, Air, and Aquatic Applications:

Use FRACTION at 3 to 4 pounds per 100 gallons of spray solution.

Use the higher rate with hard water conditions.

Use the higher rate when tank mixed with glyphosates, or other herbicides, that don't contain a surfactant ingredient.

TECHNICAL INFORMATION

Density: 63.5 lbs/ft³

Specific Gravity: Not Applicable

Flashpoint: Difficult To Burn

pH: Not Determined

Solubility in Water at 20°C: Complete

Color & Appearance: Light Blue Free-Flowing Granule

Odor: Slight Chemical

Storage Temperature - Minimum: 40°F

Storage Temperature - Maximum: 120°F

DOT/IMDG Transportation: Not Regulated

Registered With CDPR: Yes

Registered With WSDA: Yes

PRINCIPAL FUNCTIONING AGENTS

Ammonium sulfate, 2-hydroxy-1,2,3-propanetricarboxylic acid.....98.99%

PACKAGING

24 pound bag

80 bags per pallet

Item#: FRA24
