

PRODUCT INFORMATION

Leeway II™

Water Conditioning Agent / Nonionic Surfactant / Humectant / Drift Reduction Agent

GENERAL INFORMATION

Leeway II is a drift reduction and water conditioning agent formulated specifically for XtendiMax® tank mixes to reduce off-target drift.

Leeway II imparts a neutral pH.

Leeway II can eliminate antagonism of the spray tank caused by hard water minerals such as calcium, iron and magnesium.

The surfactant ingredient in Leeway II improves spray droplet spreading and penetration into the targeted leaf surface.

Leeway II provides humectancy to spray droplets resulting in a slower drying time for enhanced uptake of active ingredients.

Leeway II can be used for a wide range of pesticide and nutrient spray mixtures when accompanying labels recommend water conditioners and spreader-wetter adjuvants.

USE RATES

For Ground, Aerial or Water Conditioning: Use 2 to 4 quarts per 100 gallons of spray mixture (0.5% v/v to 1.0% v/v) when used in place of ammonium sulfate.

For Use As a Drift Reduction Agent for XtendiMax®, Engenia® or FeXapan™ Tank Mixes: Use 5 pints per 100 gallons in the spray mixture.

For General Use As a Drift Reduction Agent: Use 1 to 3 quarts per 100 gallons in the spray mixture.

Do not use this product at a rate to exceed 1% v/v of finished spray tank mixture.
