

- **Keeps Herbicides Active While in Suspension**

**Entro** is a micro emulsion concentrate that includes an alkaline pH buffered methylated seed oil with a nitrogen-based fertilizer.

- **Buffers pH of Spray Tank**

**Entro** enhances retention and penetration of herbicides sprayed onto weed surfaces while buffering the pH to minimize acid hydrolysis.

- **Enhances Spray Coverage on Targeted Surfaces**

- **Retains Spray Droplets on Weed Surfaces**

# Entro™

**Advanced Buffering Agent with MSO**

**Functioning Agents:**

100% Methylated Seed Oil,  
Nitrogen-Based Fertilizer Solution,  
Surfactant Blend, Alkali Buffer, Antifoam

**Case and Container Sizes:**

2 x 2.5 gallon per case  
36 cases per pallet
