

Leeway™

Buffering Agent, Nonionic Surfactant, Humectant

GENERAL INFORMATION

Leeway is a water conditioning agent formulated to enhance pesticide performance by modifying the hardness of spray water.

Leeway imparts a neutral pH.

Leeway can eliminate antagonism of the spray tank caused by hard water minerals such as calcium, iron and magnesium.

The surfactant ingredient in Leeway improves spray droplet spreading and penetration into the targeted leaf surface.

Leeway provides humectancy to spray droplets resulting in a slower drying time for enhanced uptake of active ingredients.

Leeway can be used for a wide range of pesticide and nutrient spray mixtures when accompanying labels recommend water conditioners and spreader-wetter adjuvants.

USE RATES

Ground / Aerial: Use 2 to 4 quarts per 100 gallons of spray mixture (0.5% v/v to 1.0% v/v) when used in place of ammonium sulfate.
