

University Reports Confirm Tournament-Ready's Effectiveness

The following charts are excerpts from the:

Evaluation of KALO Surfactants on Water Repellent Bermudagrass Putting Greens

As Reported by the University of Florida
WFREC-JAY Research Facility 2007.

Water Droplet Test—After 14 Days (Absorption in Seconds)

	0.5 cm	1.5 cm	2.5 cm	4.5 cm
Untreated	381 seconds	198 seconds	194 seconds	106 seconds
Revolution®	54 seconds	33 seconds	30 seconds	29 seconds
Tournament-Ready®	61 seconds	42 seconds	42 seconds	46 seconds

Volumetric Water Content

	Day 1	Day 29	Day 61	Day 89
Untreated	12.6	10.3	10.8	12.1
Revolution®	12.3	15.2	13.1	16
Tournament-Ready®	13.4	16	14.7	19.4

Turf Density Ratings

	Day 17	Day 22	Day 37	Day 89
Untreated	6.2	6.2	6.4	6.6
Revolution®	7.0	7.2	7.0	7.0
Tournament-Ready®	6.8	7.2	6.6	7.0

Turf Color Ratings

	Day 17	Day 22	Day 37	Day 80
Untreated	6.2	5.6	5.8	6.4
Revolution®	7.0	7.4	7.0	7.0
Tournament-Ready®	7.0	7.2	7.2	7.0

Turf Quality Ratings

	Day 17	Day 22	Day 29	Day 96
Untreated	5.6	5.4	6.0	7.0
Revolution®	7.0	7.0	7.4	7.4
Tournament-Ready®	7.0	7.2	7.2	7.8

H2O Maximizer®

Available in
2 x 2.5 gallon case
and 30 gallon drum.

Medalist®

Available in
2 x 2.5 gallon case
and 30 gallon drum.

Tournament-Ready®

Available in
5 gallon dense-pak
with spigot,
30 gallon drum
and 24 x 6 oz. pellets.

They say that good things come in threes.

Tournament-Ready®
remains the gold standard for
dependable results in any situation.

Unique blend of natural renewable resource surfactant components combined with a special class of surface-active ingredients for long lasting performance.

Quick relief into the sub-surface soil profile to manage soil repellency.

Can be used as both a preventative and curative treatment to eliminate localized dry spot in golf greens and other highly maintained turf.

University reports confirm comparable results to leading competitors at up to 35% less cost. (Univ. of FL 2007)

Available in 5 gallon dense-pak with spigot, 30 gallon drum and 24 x 6 oz. pellets.

Tournament-Ready®
SOIL SURFACTANT

H2O Maximizer®
symbolizes the very best in water
management for turf.

Spray or inject through irrigation systems.

The innovative blend of surfactants enhances water infiltration for more uniform soil moisture.

Unique polymer resin actively binds to soil particles to increase the water-holding capacity of the soil.

Proven in university tests to increase plant available water by at least 25%. (Miss. State Univ. 2011)

A great value for superintendents looking to make the most of every drop.

Available in 2 x 2.5 gallon case and 30 gallon drum.

Medalist®
offers affordable water management
benefits by combating water
repellency in soils.

Helps distribute water more uniformly through the root zone, thereby eliminating localized dry spot, enhancing turf quality and reducing watering frequency.

Can be used with irrigation injection systems, allowing turf management professionals to improve water use efficiency everywhere they irrigate.

Derived from renewable resources to provide safe, effective treatment of highly maintained turf.

Priced to fit even the tightest turf maintenance budgets.

Available in 2 x 2.5 gallon case and 30 gallon drum.
