

- **Formulated For Incorporation Into Dry Fertilizers**

## Hydro-Wet Fertilizer

**Concentrate** is a high performance turf and soil wetting agent formulated for incorporation into dry fertilizers such as ground corn cob, montmorillonite minerals, vermiculite, peat and peat Lite mixes and other soil media or inert carriers.

- **Ensures More Uniform Distribution and Availability**

## Hydro-Wet Fertilizer

**Concentrate**, when incorporated into a dry carrier, will assist the management and conservation of water to ensure more uniform distribution and availability of water to the soil root zone.

- **Reduces Watering**

## Hydro-Wet Fertilizer

**Concentrate** reduces watering requirements by minimizing soil repellency thereby reducing water evaporation and run-off.

# Hydro-Wet<sup>®</sup> Fertilizer Concentrate

**A Soil and Turf Wetting Agent for Addition to  
Soil Media, Dry Fertilizer, or Inert Carrier**

### Functioning Agents:

100.0%

Polyoxyethylenepolypropoxypropanol,  
Glycol Butyl Ether

### Drum and Pallet Sizes:

30 gallon drum  
5 drums per pallet
