**For Seed That Shows, Flows, & Sows Better**

## SEEDS TREATED WITH PIZAZZ HAVE MORE CONSISTENT COVERAGE WITH BETTER SEED FLOW!

**PIAZZ™** dry seed coating technology is designed to deliver shine and improved flow to treated seed with minimal fugitive dust when handling and applying the product. **PIAZZ** is formulated with bio-friendly components that are safe to use with inoculants and other biological seed treatment products.

### Typical Shine Powder

**PIAZZ** handles differently than the other industry seed-shine products. **PIAZZ** is made with a patent-pending formulation that reduces fugitive dust liberated during applicator fill and application to the seed.

Product	Seed Flow <sup>1</sup>	Improved Seed Flow With PIZAZZ
Leading 1st Generation Seed-Shiner Brand	14.9 g/s	<b>14%</b>
PIAZZ	17.0 g/s	

**PIAZZ** is designed for better coverage on the seed and improved seed flow over first generation seed-shine products.

<sup>1</sup>Average of treated seed samples collected from commercial field trials and then lab tested for seed flow performance.

Dispense **PIAZZ** to flowing streams of seed in a manner that allows the treatment to be distributed and coated onto the individual seed surfaces. Suggested application points include at the finished slurry treatment transition, conveyor transitions, or any other seed flow points where seed will be tumbled and rolled prior to deposit into the final seed storage container.

<b>Single application rate for soybeans:</b> 0.70 dry ounces per CWT  <b>A single application rate treats:</b> 140,000 seeds/UNIT	PACKAGE SIZE	OUNCES PER CWT	UNITS TREATED
	1-lb of Pizazz	22.86 CWT	45.72 UNITS
	10-lb bag	228.58 CWT	457.16 UNITS
	40-lb case	914.32 CWT	1,828.64 UNITS
	27 case pallet	24,688.80 CWT	49,373.00 UNITS

**PIAZZ SUGGESTED USE RATE:** 0.6 - 0.8 oz. per 100 lbs of seed. *The higher the rate, the more the shine!*
