

- **Enhances Soil Moisture Content For More Vigorous Plants**

**KA-3037** is a unique soil surfactant formulated to improve soil conditions, increase soil moisture content and reduce watering requirements.

- **Enhances Soil Microbial Activity**

Partially formulated using plant derived ingredients; **KA-3037** provides a food source for soil microorganisms.

- **Improves Watering Efficiency by Reducing Run-Off and Evaporation**

Used either preventatively or curatively, **KA-3037** works to reduce water run-off and evaporation thereby reducing irrigation costs.

- **Minimizes Soil Crusting For Assisting Emergence of Delicate Crops**

# KA-3037™

## Agricultural Soil Surfactant

**Functioning Agents:**  
30% Proprietary Blend of  
Propanediol, Glycoside

**Tote and Pallet Sizes:**  
265 gallon tote  
1 tote per pallet
