

Crop Oil Concentrate™

Contains Petroleum Distillates

GENERAL INFORMATION

Crop Oil Concentrate is a nonphytotoxic superior type of agricultural spray oil designed for use with a broad range of postemergence herbicides as well as desiccants, defoliants, and other pesticide uses.

Crop Oil Concentrate increases the activity of herbicides and, therefore, care should be exercised when herbicide spray containing Crop Oil Concentrate is applied to new varieties or highly inbred lines not previously treated with spray tank adjuvants. Use caution when applying with herbicides.

Crop Oil Concentrate may increase the effectiveness of the spray mixture. If mixture has not been used before, it is recommended that small test areas be treated before undertaking large-scale application.
