

DRI[®]

Nonionic Surfactant

GENERAL INFORMATION

DRI is a spreader-activator. It may be tank-mixed with herbicides or nutrients that recommend the use of a nonionic surfactant or spreader-activator.

DRI improves spray coverage and penetration of plant foliage.

DRI is a white micro-granule which dissolves readily in cold water.

DRI contains an antifoam agent.

DRI contains no volatile organic compounds, and is non-flammable.

USE RATES

Use the following chart to convert liquid surfactant use rate to the equivalent use rate of DRI.

Liquid Surfactant per 100 Gallons	DRI per 100 Gallons	Ounces Saved
1 pint	12 ounces (0.75 lbs) (0.125% v/v solution)	4 ounces
2 pint	24 ounces (1.5 lbs) (0.25% v/v solution)	8 ounces
4 pints	48 ounces (3 lbs) (0.5% v/v solution)	16 ounces
8 pints	96 ounces (6 lbs) (1% v/v solution)	32 ounces

If herbicide or nutrient label recommends the use of a nonionic surfactant or spreader-activator but provides no use rate, add 12 to 24 ounces of DRI per 100 gallons of water.
