

Exceed Peat Alfalfa/True Clover

Treats Alfalfa and Most Clovers (except subclovers)

GENERAL INFORMATION

Exceed Peat Alfalfa/True Clover is an economical, premixed, humus-based inoculant. Exceed Peat Alfalfa/True Clover contains billions of live bacteria that are essential in the nitrogen fixing process of garden legume plants. Exceed Peat Alfalfa/True Clover enables the plant to produce its own organic source of nitrogen, leading to more lush vine growth and ultimately greater yields. Exceed Peat Alfalfa/True Clover treats all varieties of clover, including arrowleaf clover, subterranean clover and rose clover. It does not treat subclovers. Exceed Peat Alfalfa/True Clover is not a plant food product.

DIRECTIONS FOR USE

Slurry Method: The optimum method for applying Exceed Peat Alfalfa/True Clover is the slurry method. In a container outside of the planter box, dampen the seed with non-chlorinated, clean, cool water at a rate of 8.5 ounces of water per 50 pounds of seed. Add appropriate amount of inoculant (2.5 ounces per 50 pounds of seed) and mix water, seed, and inoculant thoroughly until seed is uniformly coated. Allow 1 to 3 minutes for mixture to dry and then plant as soon as possible.

Applied Directly to Seed: Exceed Peat Alfalfa/True Clover can also be applied dry directly onto the seed. Mix seed and inoculant thoroughly until seed is uniformly coated. Layering seed and inoculant will aide in this process. NOTE: Maximum seed adhesion will not be obtained by applying this product dry.

For Seed Pre-Treated With Fungicide: Applying the inoculant dry is recommended for seed that is pre-treated with fungicide. NOTE: Maximum seed adhesion will not be obtained by applying this product dry.

For New Legume Soils: For soils that have never been host to the legume being planted, apply Exceed Peat Alfalfa/True Clover at a 1.5 to 2.0X rate, or use Exceed Peat Alfalfa/True Clover with a liquid inoculant product.

TECHNICAL INFORMATION

Specific Gravity: 0.6

pH: 6.5-7.4

Solubility: Insoluble

Color & Appearance: Dark Brown Powder or Granules

Odor: Earthy

Incompatibilities: Some seed-applied chemicals, including fungicides, may be harmful to the bacteria in this product.

Storage Temperature - Minimum: 40°F. Do Not Freeze!

Storage Temperature - Maximum: 120°F

DOT/IMDG Transportation: Not Regulated

MINIMUM GUARANTEE OF STATED

CULTURE: Contains a Minimum of 200 Million (2×10^8) Viable Cells of *Sinorhizobium Meliloti* and *Rhizobium Leguminosarum Biovar Trifolii*

PACKAGING

6 ounces per poly bag
60 poly bags per case
ALFA treats up to 50-lbs of seed
Item#: ALFA

Use Before Expiration Date Printed on Package
