

Water FX™

Dry Water Conditioner/Acidifying Agent

GENERAL INFORMATION

A significant challenge with managing spray water quality exists due to hard water minerals and water pH levels that antagonize the performance of various plant control products.

The acidifying agent in Water FX lowers the spray water pH level to optimize the efficacy of insecticide, herbicide and fungicide products that perform better with a lower pH.

Water FX is a blend of dry water-soluble granules that contain a nitrogen based water conditioner and acidifying agent.

Water FX contains ammonium sulfate which neutralizes hard water minerals that can reduce the effectiveness of many plant control products.

USE RATES

Water FX is compatible with all glyphosate formulations and with most other tank mix adjuvants.

Water FX will lower the pH level of the spray water.

For extremely hard water conditions, or for use with glyphosate herbicides: A rate of up to 4 pounds per 100 gallons may be required.

At a rate of 4 pounds per 100 gallons of a spray, Water FX provides 0.24% by weight of ammonium sulfate.

TECHNICAL INFORMATION

Density: 63.5 lbs/ft³

Flashpoint: Difficult To Burn

pH: Not Determined

Solubility in Water at 20°C: Complete

Color & Appearance: Light Blue Free-Flowing Granule

Odor: Slight Chemical

Storage Temperature - Minimum: 40°F

Storage Temperature - Maximum: 120°F

DOT/IMDG Transportation: Not Regulated

Registered With CDPR: No

Registered With WSDA: No

PRINCIPAL FUNCTIONING AGENTS

Ammonium sulfate, 2-hydroxy-1,2,3-propanetricarboxylic acid.....98.99%

PACKAGING

6 x 4 pound jugs
10 cases per pallet
Item#: WFX04
