

PRODUCT INFORMATION

Recoil™

HIGH SURFACTANT VEGETABLE OIL CONCENTRATE / PENETRANT / ACTIVATOR

GENERAL INFORMATION

Recoil is a unique, high concentration penetrant designed for use with a broad range of pesticides.

Recoil is a self-emulsifying adjuvant that replaces traditional paraffinic and MSO products.

Recoil enhances pesticide performance through dual-action delivery containing a denser population of active ingredients within a reduced molecular surface area, all at a fraction of the use rates required of traditional oil adjuvants.

USE RATES

For pesticides where an oil concentrate is recommended, use the following rates.

Ground Application: 3 to 4 fluid ounces per acre.

Aerial Application: 3 to 7 fluid ounces per acre. Refer to pesticide label for minimum water volume per acre.

Aquatic Application: 2 to 4 pints per 100 gallons of spray solution.
