### Dual Action Inoculant

#### **GENERAL INFORMATION**

One LEGACY carton contains a two-part system:

- · Super-Concentrated Liquid Inoculant;
- $\cdot$  Chitosan Based Bio-Stimulant Plus Extender.

When the two parts of the system are combined, the resulting mixture is a ready-to-apply seed inoculant, that should be applied to seed immediately.

When both parts are combined, the resulting mixture is a ready-toapply live bacteria and bio-stimulant/extender agent formulated to inoculate 50 units (2,500 pounds) of soybean seed.

On-seed survival of bacteria can last as long as 95 days after application.

#### **USE RATES**

Apply at a rate of 2.5 fluid ounces per 100 cwt, or 1.25 fluid ounces per 140,000 seeds.

This application rate is based upon 2,800 seeds per pound.

This LEGACY duo-pak inoculates 2,500 pounds of seed.

Sequential application of separate seed treatment products is recommended for best results.
