

**Yield Booster For
Garden Peas, Sweet Peas, Beans and Lima Beans**

Note: Use only on the specified legume seed.

Directions For Use

- Prepare seed bed for planting.
- Make furrow and plant legume seed into furrow without covering seed with soil.
- Using blunt device, open the container top.
- Rotate the lid to either shaker holes or wide opening to disperse inoculant.
- Apply granular inoculant in the furrow next to the seed. Apply ample amounts to ensure proper nodulation of emerging roots. Over-application is not detrimental and has shown to be beneficial.
- Cover the seed and inoculant with soil.
- To ensure optimum performance of Nature's Aid Garden Soil Inoculant, water plants as directed throughout growing season.
- Treats up to 150 feet (46 meters) of row.

USE BEFORE EXPIRATION DATE

Do not use after labeled expiration date. Destroy unused product after expiration date. Outdated inoculant should be discarded into the normal trash stream.

EXPIRES:

LOT NUMBER:

Granular Garden Soil Inoculant

**Yield Booster For
Garden Peas, Sweet Peas, Beans and Lima Beans**

**Contains a minimum of 100 million (1x10⁸) viable cells per gram of
bradyrhizobium sp., rhizobium leguminosarum and R. phaseoli**

CAUTION: Although the contents of this bag are completely organic, avoid prolonged or repeated skin contact and inhalation. Wash hands with mild soap after use.

STORAGE: Store bag in a cool place. Keep closed until use. Protect inoculant bag and inoculated seed from sun, high temperatures and hot winds.

Nature's Aid Granular Garden Soil Inoculant is 100% Organic

Net Weight of Contents: 8.7 Ounces (246.64 Grams)

**Yield Booster For
Garden Peas, Sweet Peas, Beans and Lima Beans**

Note: Use only on the specified legume seed.

General Information

Nature's Aid Granular Garden Soil Inoculant aids in growth and production of all varieties of garden beans, lima beans, garden peas and sweet peas. This product will not aid in the production of soybeans.

Nature's Aid Granular Garden Soil Inoculant contains millions of live bacteria that are essential in the nitrogen fixation process of garden legume plants. These bacteria, when properly placed in the root zone area of the soil, will actively convert atmospheric nitrogen into a usable form for the plant; therefore enabling the plant to produce its own organic source of nitrogen, leading to more lush vine growth and ultimately greater yields.

Nature's Aid Granular Garden Soil Inoculant is 100% organic.

Limited Warranty

This product is warranted to produce satisfactory nodule formation and nitrogen fixation under favorable conditions of soil or climate when used before expiration date or purchased price will be refunded. Since many factors other than inoculation affect crop production, the manufacturer assumes no responsibility for loss or partial loss of crop from any cause whatsoever. This limited warranty is in lieu of other warranties, expressed or implied.
