

KALO Modified Vegetable Oil™

Modified Vegetable Oil Concentrate and Antifoaming Agent

GENERAL INFORMATION

KALO Modified Vegetable Oil is a unique blend of highly refined and modified spray oil and superior nonionic surfactant.

KALO Modified Vegetable Oil's chemistry allows for superior wetting and absorption of those pesticides or products which labels recommend the addition of a spray adjuvant to improve coverage.

The addition of KALO Modified Vegetable Oil to a spray tank solution will improve a spray application by physically modifying the deposition and wetting characteristics of the spray solution, the result being a more uniform spray deposit.

The use of KALO Modified Vegetable Oil can increase pesticidal activity where the following factors occur, but is not limited to:
1) When used in areas of the country with low relative humidity and high temperatures, 2) When target species are larger than label recommendations at time of application.

USE RATES

Typical Use Rate: Use 1.5 to 2.0 pints per acre.

Always read and follow all label directions of the herbicide being applied.
