

## DUAL-ACTION LIQUID SOYBEAN INOCULANT

**LALFIX® PRO DOSE LIQUID Soybean** is a high concentration, low volume liquid soybean inoculant containing *Bradyrhizobium japonicum*. Lallemand Plant Care utilizes two strains of *Bradyrhizobium japonicum* for increased nodulation and atmospheric nitrogen fixation by forming a symbiotic relationship with the soybean plant.

LALFIX® PRO DOSE LIQUID Soybean is designed for the Seed Treater requiring a high titer inoculant, offering precise flowability through application equipment with limited tackiness in a single bladder for increased application efficiency.

### ADVANTAGES

- Easy to Use, single bladder
  - Increased efficiency & less waste
- Highly concentrated liquid inoculant with maximized titer
- Low use rate allowing for highly precise treating
- Quick drying time, providing minimal tackiness and improved flowability through application and planting equipment

### CHARACTERISTICS

#### Active Ingredient

$1 \times 10^{10}$  CFU/ml *Bradyrhizobium spp.*

#### Package Size

- 1 X 400 unit bladders 300-oz bladders packaged (45 cases per pallet)
- 1 X 400 unit bladders 300-oz bladders – bulk totes (80 bladders per tote)

Always read and follow label instructions

### APPLICATION RATE

- 1.5 fl. oz. per 100 lbs. of seed

### EASY TO USE FORMULATION

- One package (no mixing required)
- On-seed life of 210 days
- Limited tackiness/bridging

#### About Lallemand Plant Care

Since the beginning of the 20th Century, LALLEMAND has been an expert in yeast and bacteria manufacturing. The family-owned company is now a global leader in the development, production, and marketing of microorganisms for various agri-food industries. Using sound science and know-how, LALLEMAND PLANT CARE (LPC) works closely with clients to deliver the right technology, in the right formulation, for the right application. LPC is committed to solving grower challenges, significantly improving yield and crop vitality.
